# WHISKEY FAQs

---

## WELL, WHAT IS WHISKEY?

**WHISKEY:** A spirit which is fermented from the grain mash of rye, barley, corn, wheat, and other malted grain, in charred oak barrels

---

## WHAT'S THE DIFFERENCE BETWEEN RYE, BOURBON, MALT WHISKEY *and* CORN WHISKEY?

The answer lies within each Liquor's Grain Bill (mash Recipe), since each liquor has it's own recipe:

**RYE WHISKEY:** Has a Mash of at least 51% Rye.

**BOURBON:** Has a Mash of at least 51% Corn.

**MALT WHISKEY:** Has a Mash of at least 51% Malted grain usually.

**CORN WHISKEY:** Has a Mash of at least 80% Corn.

---

## SO WHAT'S THE DIFFERENCE BETWEEN EACH KIND?

**RYE WHISKEY:** Spicier sometimes fruitier flavour.

**BOURBON:** Fuller more savory flavour.

**MALT WHISKEY:** Neutral and powerful flavour.

---

## WHERE DO WE GET PROOF FROM?

Suspicious buyers used to mix gunpowder with whiskey and lit it; if nothing happened it was watered down if it exploded it was "proof" that it was 100% whiskey.

---

## IS THERE A PROOF LIMIT TO BOURBON?

It can be no more than 160 proof (80% alcohol)

---

## SHOULD I DRINK WHISKEY STRAIGHT *OR* ON THE ROCKS? DOES IT REALLY MAKE A DIFFERENCE?

It's your drink, drink it how you like it. Most distillers consider that a whiskey's flavor is enhanced by having small addition of water: either with one cube on the rocks or adding a drop of water straight up.

---

## DOES THE AGING PROCESS VARY BETWEEN THE STYLE OF WHISKEYS?

**WHISKEYS:** Are all aged in some form of oak cask: for most international whiskeys a minimum of 3 years, American whiskeys can be less than this as long as the ages is listed

**BOURBONS:** A brand-new white oak cask is charred on the interior with a blowtorch before the liquor is poured in to be aged.

**SCOTCHES:** Are aged initially in a second-hand cask, usually a bourbon cask, then transferred to another cask to give it its finish.

---

## WHAT'S THE DIFFERENCE BETWEEN SINGLE CASK, SINGLE MALT, *OR* BLENDED WHISKEYS?

**SINGLE MALT:** The bottle came from a single distillery + a single malted grain. It consists of whiskeys from differing barrels and ages, put together in a specific combination to keep the flavor consistent over time

**SINGLE CASK/BARREL:** This style of whiskey comes from only one individual cask, meaning the taste of these whiskies changes distinctly from cask to cask.

**BLENDED WHISKEY:** The most common variety is made of a mixture of different types of grain whisky usually from a multitude of distilleries.

---

## WHERE DOES WHISKEY COME FROM?

The first confirmed existence of whiskey is in Ireland in 1405.

---

## WHAT DOES THE WORD "WHISKEY" MEAN?

Whiskey comes from the Gaelic term *Uisce Beatha* which means the "water of life".

---

## CAN WHISKEY SAVE MY LIFE?

We are glad you asked, single malt whiskey has been found to contain significant amounts of ellagic acid – an antioxidant known to help prevent cancer.

---

## WHY DO DISTILLER'S SAY ANGEL'S LOVE WHISKEY?

Going back hundreds of years distiller's found the about 4% of whiskey was "stolen" of every barrel by angels so they could check to see if it was okay, an amount we now know is due to evaporation.
